ROMAN and OTHER CEMENTS Manufactured by J. M. BLASHFIELD, successor to the Patentees PARKER and WYATT, who in 1796, first introduced PARKER'S ROMAN CEMENT; also Terras and Portland Cements, English and French Plaster, Terra Cotta Chimney Pots, Trusses, &c.
Manufactory, Mill Wall, Poplar; Depôts, Commercial-road, Lambeth, and Paddington basin.

ATKINSON'S CEMENT, so long known and esteemed in London, for plastering purposes, is a quick-setting material that requires no colouring. Sold exclusively by JOHN BAZLEY WHITE and SONS, Millbank-street, Westminster; and Seel-street, Liverpool.

KEENE'S and PARIAN CEMENTS and FRENCH PLASTER for internal use.—These well known hard stuccoes dry quickly, and can be painted upon within a few days. Made and sold by JOHN BAZLEY WHITE and SONS, Millbank-street, Westminster.

PORTLAND CEMENT is the cheapest, because the best Cement for external uses. As a stucco, it requires no colouring, does not vegetate, and is not affected by frost. As a mortar for brick work, it may be mixed with three to four parts of sand; and, for concrete, it will carry ten to twelve times its volume of sand and gravel.—Manufactured by JOHN BAZLEY WHITE and SONS, 17, Millbank-street, Westminster, and Seel-street, Liverpool.

PORTLAND CEMENT.—The difficulty of procuring this valuable Cement of uniform colour and strength has hitherto prevented its more general use. Contractors and Builders will find that these two important qualities may be depended on with the greatest certainty in that manufactured by CHARLES J. HILTON, at his Roman and Portland Cement and Plaster of Paris Works, Faversham, Kent, at which place, as also at his Wharfs in London, 6, Upper Thames-street, City, and Great Peter-street, Westminster, orders can now be received to any extent.

PORTLAND CEMENT.—JAMES WESTON, having commenced manufacturing the above Cement, begs to inform the trade in general that he can supply them with any quantity they may require, either at his Works, Mill wall, Poplar, St. Andrew's Wharf, Earl-street, Blackfriars; or Middle Scotland-yard, Westminster. Manufacturer of Roman, Lias, and Mastic Cements, French and English Plaster, &c.

PORTLAND CEMENT WORKS, NORTH-FLEET, KENT.—Messrs. ROBINS and CO. solicit the attention of their friends and the public to their superior Cements, confident that the great improvement in the manufacture thereof during the present year will insure to them a continuance of that patronage with which they have so long been favoured. Orders addressed to the Works, and to Grant-street-yard, Whitehall-place, Horse, 1858.

6, South Wharf, Paddington.

PORTLAND CEMENT.—CHARLES RICHARDSON has the greatest confidence in introducing to the trade the above superior CEMENT, being of uniform colour and quality a desideratum never before attained in Portland Cement. It possesses extraordinary cementitious qualities, retains the tenacity of fresh and fresh, and is free from all vegetable or other Cement; does not vegetate, burn grass, or crack; combined with which is eminent hydraulic properties stamp it evidence as the first cement of the day for work where all the above qualities are requisite. It is manufactured on the only perfectly Portland Cement can be, and contrary to the dictum so put forth by the one who knows hitherto held the monopoly. Manufactured only by R. GRAVES, Esq. at Is Worm, near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

MEDINA (ROMAN) CEMENT.—The material of which this cement is made is obtained in the Isle of Wight. It has all the properties of the Sheppy Stone, but is much better adapted to engineering works, from the rapidity with which it sets and hardens under water. It has been long used at the great Breakwater at Cherbourg; in a similar work at Aldeburgh, and at Dover New Pier, to unite the masonry. The foundation of the centre pier of the Tubular Bridge at Menai Straits is laid in Medina Cement. A new groyne at Sandown Bay, Isle of Wight, has been constructed of no other material but this cement and sea shingle. The work extends 200 feet into the sea, and is exposed to the most violent gales of the Channel, in a position where every former construction had been repeatedly washed away. The inconveniences of the varied qualities of Roman Cement are superseded by the use of this improved manufacture.
CHAS. FRANCIS and SONS, Nine Elms, London; or West Medina Mill, Newport, Isle of Wight.
Agent for Southampton, R. L. FLUDER, American Wharf.

PERMANENT STUCCO WASH, WITHOUT SIZE OR OTHER CORRUPTIBLE INGREDIENT.
At meet at 68, Gresham House, Old Broad-street, Bishopsgate, and JOHN and CO. beg to call the attention of Architects, Builders, and others, to their improved method of producing a permanent stucco wash, in the manufacture of which they have had many years' experience, and which they offer to the notice of the Trade and the Public generally, as possessing many advantages over the common Lime Wash or Water Colour STUCCO or BRICK WORK. It is a Stone Colour, but may be tinted to any other.—DOES NOT WASH OFF.—is perfectly dry in twenty-four hours, and, being compounded of materials chemically adapted for Railway Stations, Public Warehouses, Manufactories, Schools, Prisons, &c. One coat will cover two square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.
JOHN and CO.'S STUCCO CEMENT.—This cement, from the great reduction in price, and its suitableness for internal as well as external surfaces, places it above all other materials of its kind; it has no caustic qualities, may be painted or papered in a few days; never blisters, cracks, or vegetates; may be used in cases or marble slabs, and may be cleaned with a brush and water.
The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prospectuses, and every information may be obtained at the warehouse, 68, Gresham House, Old Broad-street, City. PHILIPHARE and Co. at the manufactory, 30, Great Guildford-street, Upper Thames-street. A liberal allowance to wholesale dealers.
